

DEPARTMENT OF CSE (CYBER SECURITY)
PRESENTS

impact X 26

24 HOURS | NATIONAL LEVEL HACKATHON

About RNSIT

Established in 2001, RNS Institute of Technology (RNSIT) is a premier engineering college in Bengaluru. With a vibrant campus and modern infrastructure, RNSIT is home to thousands of aspiring engineers guided by experienced faculty. The institute is well known for its innovation, research culture, and strong industry connect, ensuring excellent placement opportunities every year.

About IEEE CS

The IEEE Computer Society student chapter at RNSIT is one of the most active technical communities on campus. It empowers students to explore computing and emerging technologies through workshops, hackathons, and expert talks, while fostering innovation, collaboration, and industry connections.

ImpactX'26

ImpactX 26 is RNSIT's flagship 24-hour national-level offline hackathon, presented by the Department of CSE (Cyber Security) in collaboration with the IEEE Computer Society. Bringing together B.E/B.Tech and MCA students from across India, the event celebrates creativity, learning, and competition, offering an exciting ₹1,00,000 prize pool and a major platform to showcase projects.

Sponsorship Opportunities

- Exclusive logo placement on banners, posters, website, and social media
- Branding on certificates, merchandise, and stage backdrops
- Dedicated space for promotional materials during the event
- Opportunity to deliver a keynote or address participants
- Opportunity to sit on the judging panel to evaluate final project pitches.
- Offer direct internship or full-time employment interviews to top performers, winners, or stand-out participants.
- Create a specific "Sponsor Challenge Track"
- Directly sponsor specific high-energy segments.

Themes for the Hackathon

Cybersecurity and Blockchain

Build secure systems that protect data and identities from cyber threats and use blockchain to enable transparent, tamper-proof, and decentralized solutions.

MCP Model Context Protocol

Design and implement protocols for AI model management, ensuring control, safety, and interoperability.

Agentic AI

Create autonomous agents that perceive, reason, and act independently in complex real-world environments.

These themes are anchored in the core forces shaping modern technology—security, trust, and autonomy. Designed to cultivate solutions reflecting real-world complexity, industry relevance, and forward-looking innovation, these themes can be dynamically adapted to align with the convenience and strategic goals of the sponsor.

Registration Details

- Team Size - Upto 4 members
- After phase 1 selected teams compete in phase2
- Registration Fees - ₹1299 per team
- 150+ Participants From 20+ Colleges

PRIZE POOL

1,00,000

30,000 per Track

10,000 for Unique Solution
